

KNOW WHERE TO GO

if you're attacked by

ZOMBIES!

For a life- or *limb*-threatening emergency -

DIAL 911!

Aurora Health Access (AHA) is a community alliance of healthcare organizations, public agencies, providers, civic and business leaders, and residents committed to creating a healthcare system in Aurora that meets the needs of all of its residents. AHA can come together to discuss and develop solutions to health access issues. We have three objectives: increase access, expand coverage, and build collaboration. Funding for this project provided by The Colorado Health Foundation.

1. Primary Care Clinic: If possible, visit your regular doctor or family clinic. They know you, your medical history, and it's likely less expensive.

- Have your medical records handy
- Know "all of you," not just the injury or symptom you have right now
- May offer walk-in appointments or referrals
- Less expensive than an emergency room

Unless you suspect your doctor has become a zombie!

2. Urgent Care Clinic

- Walk-in services to treat most non-serious medical conditions: colds, allergies, cuts, and sore throats
- Often open evenings and weekends (sometimes 24/7)
- Accept many insurance plans
- Costs (out-of-pocket, cash and/or insurance co-pays) usually lower than emergency room

3. Emergency Room

- Free-standing or hospital-based emergency rooms
- Usually much **HIGHER** costs (cash and/or co-pays)
- Save for life- or limb-threatening emergencies

But it's best to figure out your options **BEFORE** the zombie apocalypse.

- Visit the facility in your area that you'd likely use in a zombie attack
- Find out what kind of facility they are
- Find out whether they take your insurance
- Ask about hours/services, etc.

Read your insurance policy (ha ha! Nobody does that.) or contact your insurance provider to find out whether they have 24/7 nurse care line (where you can call for zombie advice); find out how your co-pays work in various facilities, etc.
